

THE CLIMATE PATH

A single, unbiased source of credible, accessible climate and environmental education for the healthcare industry

The Climate Path is hosted on www.CPDmatch.co.uk, a pioneering non-profit platform connecting healthcare professionals, employers, and supplier industries with education focused on the triple planetary crisis: **climate change, pollution and loss of biodiversity**.

The Climate Path

is the first structured, expert-curated, educational pathway which enables individuals and organisations operating within the healthcare sector build climate and environmental literacy in a certified, monitored and reportable format.

The Climate Path enables

- ✓ Individuals to grow their knowledge, align with their organisation's sustainability goals and gain credibility for working with healthcare systems shifting toward sustainability and system thinking.
- ✓ Organisations to demonstrate engagement in sustainability education, improve reputation, support NHS procurement requirements and evidence staff progression in ESG reporting.
- ✓ Effective communication between all individuals working in the value chain creating shared partnership values between clinical and procurement teams and the suppliers of products and services.

The content

offers free, virtual, on-demand learning, purpose-built to address the full range of challenges associated with the climate and environmental emergency. All materials are regularly reviewed to ensure they remain accurate, relevant, and up to date.

The Climate Path transforms environmental intent into organisational capability through integrating environmental literacy into professional development rather than positioning it as optional awareness training.
